

# MAXIMIZE THE VALUE OF CONCUR INVOICE WITH PRODUCTIV

Concur® Invoice automates accounts payable processes for effective cash flow management and greater control over spend. With the Concur Invoice Connector from Productiv, Procurement and IT professionals can track SaaS application spend by vendor in Productiv SaaS Intelligence™ Platform and identify spend optimization opportunities across departments and app categories.

## Get more out of Concur Invoice

Track SaaS spend through vendor payments in Productiv by integrating with Concur Invoice. Gain shared insights about SaaS applications across Procurement, IT, Finance, and business teams.

## Understand your SaaS payments

View paid invoices by application month-over-month. Sort and filter invoices by ID, user, department, cost center, category of application, and many other fields.

## Analyze spend across teams

Discover apps and gain visibility into app spend for your organization. Understand the amount spent with each vendor for their applications and services by department.

# ABOUT PRODUCTIV + SAP CONCUR

SAP® Concur® is the world's leading brand for integrated travel, expense, and invoice management solutions, driven by a relentless pursuit to simplify and automate these everyday processes. Productiv is the only SaaS management platform built on SaaS Intelligence, providing a data-driven approach to improving SaaS visibility and cost optimization. Companies like Fox, Uber, and Zoom use Productiv to create a system of record for their SaaS portfolios with the most detailed view into how software is actually used. With robust data and insights, IT is able to unlock new transformational change for their organizations while more efficiently executing on day-to-day operations. Founded in 2018 and backed by Accel, IVP and Norwest Venture Partners, Productiv is on a journey to transform how you think about SaaS and the impact it can have on your organization.

## HOW IT WORKS

Productiv connects directly to Concur Invoice via API to retrieve detailed invoice data. Additionally, you can connect your core platforms such as finance, expense, contracts, SSO, CASB, and HR to supplement important SaaS information. From there, you'll have a unified view of your applications and spend.
